## **Banning's Streetlight Replacement Program**

(BANNING, California) – The City of Banning Electric Utility Department has started a three year “Streetlight Out” program to replace approximately 7,000 inefficient high pressure sodium streetlights with energy efficient light-emitting diode (LED) streetlights throughout the City of Banning. When the program is completed, the City anticipates energy reductions in excess of 2,000,000 kilowatt-hours per year. This will result in the City’s annual electricity savings of nearly \$200,000.

For more information please call (951) 922-4860
